	Examiner Peter P. Nerbun	Art Unit 3765	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The disclosure is objected to for containing a grammatical error. On page 14, line 22, after "actively", --to-- should be inserted.

Claim 1 is objected to for containing a grammatical error. In claim 1, line 11, "at least intake aperture" should be changed to --at least one intake aperture--.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Desimone et al. The patent to Desimone et al discloses a goggle having an air venting system comprising: a goggle body 11, Fig. 1, a lens 14 mounted in a lens aperture, an eye cavity, at least one intake aperture 12, Fig. 2 communicating through said goggle body with said eye cavity; and at least one clip 16, Fig. 5, said clip having a leading edge (at 26, Fig. 1), a trailing edge (adjacent 32), connected by a pair of side edges, an interior clip surface and an exterior clip surface; a clip aperture 17, Fig. 5 communicating through said clip between said interior surface and said exterior surface; means of attachment 27 of said clip to said sidewall; and said exterior surface of said clip between said clip aperture and said leading edge dimensioned to create a low air pressure area immediately adjacent to said clip aperture when moving air travels over said leading edge. With regard to claims 13 and 14 it is noted that applicant recites "at least one clip is a member of a kit of clips". Claims 13 and 14 are both directed to a sport goggle. Recitation of a "kit of clips" does not further limit these claims since only

one clip is present on the goggle at any one time. Therefore the clip structure of the goggle is defined by a single clip rather than by all the members of a kit of clips. The clip of Desimone is a member of a kit of clips since Desimone's clip may be removed and replaced with another clip.

Claims 3-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter P. Nerbun whose telephone number is 571-272-4992. The examiner can normally be reached on M-F (1st Week) M-Th (2d Week).
